What an inspired combination!

A mix of shrubs (yes, you'll have to remove them eventually and plant in the ground) along with a ground cover wintergreen and sparkling white hellebores, this combo will look great right through the winter in zones 7 - 9. Colder zones will need to substitute something a bit more hardy for nandina (we suggest a holly such as [Nordic™ Inkberry Holly](#), which looks somewhat the same and stays somewhat small).

Who needs lots of flowers, right?

See the entire project at the [Frustrated Gardener](#).
